PROFESSIONAL SUMMARY

IT professional with 2+ years of experience in technical consulting and IT support. Skilled at bridging business and technology, gathering requirements, designing practical solutions, and coordinating with developers to deliver results. Brings a simple-first mindset: configuring out-of-the-box before proposing custom builds, keeping costs down and solutions sustainable. Effective communicator with both technical teams and non-technical stakeholders.

PROFESSIONAL EXPERIENCE

Associate Technical Consultant • Optimate.Me

Mar 2025 – Jun 2026

Brisbane, QLD, Australia (Remote)

- Served as primary technical point of contact for CRM clients, translating business requirements into functional SugarCRM configurations, custom modules, and workflow solutions.
- Conducted meticulous requirements-gathering sessions and client discovery calls to document pain points, propose system solutions, and align stakeholder expectations, consistently surfacing the real problem before scoping any solution.
- Applied a simple-first solution philosophy: exhausting out-of-the-box configuration and cost-effective options before escalating to custom development, reducing unnecessary build costs for clients.
- Designed and documented technical solution architecture for CRM customisations including custom package development, field logic, and data integration pipelines.
- Coordinated with offshore developers to scope, spec, and validate custom-coded solutions, acting as a bridge between client needs and technical implementation.
- Built and maintained data-cleaning and matching pipelines to reconcile data records against external ERP/inventory systems.
- Managed project tasks and deliverables using ClickUp, with clear communication across client and internal teams via Outlook and Microsoft Teams.
- Maintained accurate records of client interactions, system changes, and issue resolutions to support ongoing support and audit trails.
- Conducted QA/QC and UAT activities for CRM customisations, writing and executing test cases, coordinating client UAT sessions, gathering feedback, and signing off on solutions before go-live.
- Managed day-to-day client support, including responding to enquiries via email, maintaining the shared support inbox, tracking SLA timelines, and raising and following up tickets with SugarCRM support.

IT Specialist • Leon's Tech

Jan 2024 – Feb 2025

Brisbane, QLD, Australia

- Provided end-to-end hardware and software support for mobile devices and computers, including screen replacements, OS reinstalls, and performance troubleshooting.
- Delivered personalised IT support to customers for device setup, data migration, and configuration of Windows and macOS environments.
- Logged and maintained detailed records of repair activities, customer interactions, and resolutions to ensure quality service and accountability.
- Collaborated with team members via Slack to share knowledge, streamline workflows, and continuously improve service processes.

- Developed and optimised Angular front-end modules, implementing CRUD operations, lazy loading, and code splitting to enhance user experience and performance.
- Participated in requirement discussions with senior engineers to determine system approval workflows, payroll integration requirements, and employee record functionalities.
- Contributed to code reviews, adhering to team coding standards and best practices, and collaborated cross-functionally to resolve development feedback.
